SUMMARY

CS & Software Engineering grad (UWB, 3.74 GPA) with hands-on Unity development experience, including an AI agent system optimized for a ~16x (2.9 → 46.7 fps) performance gain across 128 agents. Strong in C#, gameplay systems, and game art production (Illustrator, Blender), production experience shipping a customer-facing feature on the Costco iOS app within a 30-person Agile team. Proficient in Java, C#, Python, and JavaScript/React, with strong foundations in algorithms and software architecture.

EDUCATION

University of Washington - Bothell, Bachelor of Science

Sept 2022 - Jun 2026

Major: Computer Science & Software Engineering

GPA: 3.74

Minors: Data Science, Visual & Media Arts

Relevant Coursework: Game development, Project management, Computer Simulation, Artificial Intelligence, 3D Graphics, Operating Systems, Data Structures & Algorithms, Software Analysis & Design, Software Engineering, Hardware & Computer Organization, Data visualization, Statistics, Interaction Design

SKILLS

Programming Languages: Java, C#, C++, Python, JavaScript, Swift

Tools & Frameworks: Git, Visual Studio Code, Xcode, Charles Proxy, Linux console, Unity, HTML, CSS, React, WordPress, Illustrator, Photoshop, Figma, Blender, Inventor, Fusion 360, Azure AI & ML, Tableau

Certifications: Programming Fundamentals in Swift, Microsoft Certified: Azure AI Fundamentals, Meta React Basics

Languages: English, Korean

WORK EXPERIENCE

Database Student Assistant - University of Washington Medicine - Seattle, WA

Jul 2025 - Aug 2025

- Audited over 500 faculty members' information in the Interfolio Database.
- Processed over 100 records per week in order to meet a deadline.

Software Engineer Intern - Costco Wholesale - Issaquah, WA

Jan 2025 - Apr 2025

- Contributed to the Cake order feature for the Costco iOS App in an Agile environment with a team of ~30 members.
- Delivered 10+ user stories adding Adobe analytics, tracking with Charles Proxy and improving screen reader accessibility, alt text, and UI highlights.
- Conducted 10+ code reviews for other team members.

Website Developer Intern - University of Washington - Bothell, WA

Jun 2023 - Aug 2023

- Designed and planned a 6-page educational website (WordPress), teaching best practices for creating portfolio and presentations, with 1200+ views on the site and used by multiple UW faculty for teaching purposes.
- Conducted in-depth research on UX design and Wordpress to create website content, optimizing user engagement through visual design and educational resources.
- Created custom illustrations (Adobe Illustrator) to enhance the site's aesthetics for improving visual appeal and user retention.

PROJECTS

Hero Shooter Maker - Personal Project & Capstone

Jan 2026 - Jun 2026

- Created AI agent system to control characters without player input. (Unity, C#)
- Optimized object detection with Unity Job System, increasing performance ~16x (2.9 → 46.7 fps) when 128 agents are in the same location.
- Implemented decision tree based AI system to let designers author character behavior without code.
- Created a game object based event driven modular ability system.
- Created character systems that support character and team creation along with character interaction.

Fifty / Fifty - CSS 385 Game Development

May 2026

- Developed a "Buckshot roulette" inspired turn-based multiplayer 1 vs 1 strategy game with a team of 3 members. (Unity, C#)
- Studied and implemented Unity's Netcode for GameObjects multiplayer integration.
- Created all art assets, including the background art, 54+ cards and coin art, and other UI elements.
- Responsible for updating the Kanban board with 30+ cards to keep progress clear.

Hiver Drive - Tri-Campus Game Jam 2026

Apr 2026

- Developed a driving & extraction game in a solo development environment. (Unity, C#)
- Designed the movement system to fit the jam's theme of "It's not a bug, it's a feature" by using a translation based movement system with known tunneling bugs.
- Created all art assets and UI, including the player character, points, portals, background, etc. (Illustrator, Krita)

Bitmask Carnival - Global Game Jam 2026

Feb 2026

- Developed a challenging bitwise operation based puzzle game (Godot) with a team of 9 members within 48 hours, limiting scope to 5 polished puzzle levels.
- Created 6 unique character arts that convey each character's design and personality. (Illustrator, Krita)
- Designed the last 3 levels of puzzles to challenge the player. (Godot)

Acetaminophen Project - Computer Simulation

Dec 2025

- Created a system dynamic model showing Acetaminophen metabolism and the amount of metabolites remaining in the body. (Python)
- Researched and implemented the Acetaminophen metabolism algorithm.
- Implemented customizable body information. Can also take alcohol intake into account.

RESEARCH EXPERIENCE

UW SEAL (Sensors, Energy, and Automation Laboratory)

Jul 2024 - Dec 2024

- Designed 6 interactive web pages to showcase robotics projects. (WordPress Elementor)
- Developed a custom slider (Slider Revolution and Shortcode) to give an interactive display to visitors.
- Implemented UI/UX of the dashboard app (Figma) for other UW SEAL members with focus on usability and clarity.

Issaquah Robotics Society

Sep 2018 - Dec 2023

- Designed and assembled robot modules in Autodesk Inventor and Fusion 360.
- Worked with a team of 70+ members and won awards, including the Industrial Design and Creativity Awards.
- Contributed 3+ hours daily to prototyping and building robots for competitions
